PROFILE SUMMARY

I am a passionate web developer who loves learning new technologies and solving problems. I focus on creating simple, efficient, and modern frontend and full-stack solutions.

PROJECTS

- **Smart'Z Findery — Online Shopping Website:** A modern and responsive eCommerce website built with HTML, CSS, and JavaScript. It features a user-friendly interface and dynamic shopping functionalities.
- **Family Health — Smart Family Healthcare Management System:** A platform to manage health records of all family members in one place, improving awareness and timely care.
- **My Portfolio Website | Next.js, Tailwind CSS & Framer Motion:** Showcases my skills and projects with clean design, smooth animations, and responsive layout.
- **Study Bondhu:** Educational platform providing students with learning resources, notes, and study support.
- **Weather App:** Provides real-time weather updates including temperature, humidity, wind speed, and forecasts.
- **UniConnect:** Connects university students to share updates, interact, and stay connected within their campus community.
- **Namaz Time:** Provides accurate daily prayer timings to help users perform prayers on time.
